# SAMPADA

Dear Alumni,

We are overwhelmed by the response got by our fellow Alumni in India and abroad towards the MegaReunion 2011. We would like to mention that early bird offer for the individual registrations are over. However we still are extending a discounted rate for the alumni who register within November 30th, 2010, in the for of Group Registrations.

### AVAIL THE BEST OFFER FOR GROUP BOOKINGS BY ADDING YOUR BATCHMATES, SPOUSE AND KIDS IN A SINGLE REGISTRATION !!!!

**GROUP REGISTRATIONS**

**UVCE MEGAREUNION**

**20% OFF**

### AVAIL 20% DISCOUNT ON GROUP REGISTRATIONS

**Special points of interest:**

- VISIONUVCE- One year Anniversary
- Essay/SOP Review
- What others are saying about MegaReunion?
- Think Piece by UVCEians- Patents
- Life @ UVCE - By an alumni of 2009 Batch

# EDITORIAL

Hello Readers,

It has been a wonderful, joyful and nostalgic ride since the last year and the most satisfying of them all is delivering 11 consecutive editions of SAMPADA. We hope that we have made a small impression with which Sampada comes to your mind every time you crave for those campus memories.

Campus has never been so active since the past 2 years..!! But now I can feel the rush of active liquids oozing out of the minds which had been made passive with no activities. A lot of activities are lined up to enthrall the students of UVCE.

One thing which i had always thought, all the companies that visited our campus had said the same too, that knowledge base had declined among students. Some said, it is lack of preparation, some blamed it over the faculty and some on the casual attitude at the college. But to me it was all about the attitude of the students as some bask in glory when they say, " I got 70% marks without studying a bit " and  also the big difference in what the companies expect and what is gained here.

To brush aside such alarming developments, initiatives by alumni have started gathering steam that are out to bridge the above mentioned gaps. One such group from the batch of 2005 is teaching the students of CSE and ISE, the core concepts of each technical arena and educating them about the expectations from the companies. Alongside this, "Samvaada", a VisionUVCE initiative, has geared up with activities and sessions that cover varied topics with our alumni expressing outright acceptance to share the knowledge. Get deeper into events inside the campus, we have acclaimed events like, KAGADA, a national level paper presentation contest which provides platform to showcase the talents and research work.

Latest to join this bandwagon is, a slew of initiatives from the Dept of ECE, UVCE. There are technical seminars being conducted every fortnight and minds from ISRO, UPARC ( Upagraha Amateur Radio Club ) will be there on Nov 2nd, to educate the kids about HAM RADIO and Satellites. But the appreciable part of all these is, students have shown enough interest in all of them. I guess this is the right way to go.

If you think against it, Well..! We have space to accommodate you too. Come join all of us with your set of ideas that helps college any which way. Welcome on board..!!

Thanks,
Team Sampada.

---

# SAMVAADA

VISIONUVCE team, as already announced, has started a definitive, fruitful interactive sessions for the students in college (of all batches and branches) It is coming out in the name of "SAMVAADA", which covers the topics- (Technical, Higher Studies opportunities, Quantitative/ Aptitude, Personality Development/ Team Building skills and others)

Samvaada conducted an event on 30th October in UVCE with an educative, fun intended event that had around 25 students actively participating in it. It was intended at conveying them about the things in the store of Samvaada and what they can expect out of it. We were very happy that the event went well and the students enjoyed it too. We had a Name-Game, after which I'm sure all the students would forget their buddies names and interact with them through the symbols. This was followed by an event that tested the students of their analysis and descriptive skills and everyone did really well. This was followed by the feedback and suggestions timeout which helped us to understand the minds of students. We came back from the sessions satisfied and with a hope to continue this in long run.

# VISIONUVCE

Wawo..!! Congratulations to VisionUVCE team, for completing one successful year serving as the window of information over the internet catering to thousands of UVCEians, lending its support for MEGAREUNION, for which VISIONUVCE is a very important platform. It started with a simple and humble UI with basic features of a website and since then has garnered enough mileage to become a hit among all the UVCEians and filled the void created by the absence of a dedicated website for the college alumni. We are happy to be using it and we wish it carries on for the years to come.

MegaReunion has slowly but steadily entered the fast-track mode and things are happening quite swiftly. UVCEians have realized the importance of organizing such a mammoth get together. The registrations for the event have crossed appreciable numbers of 750 and the group registrations have taken centre-stage and the block registrations are sure to push the numbers to a greater heights. It is your event and register today itself by visiting our website, www.visionuvce.in.

Along the same lines, the VisionUVCE repository now contains the details of about 900 UVCEians enhancing the richness and reachability. We hope to maximize the numbers to a great extent and voice out to as many UVCEians as possible.

With 93 years of vast history comprising of greatness, pride and even greater personalities, we feel it is our duty to introduce all the UVCEians of the personalities, great minds whose rendered service has given light to many domains, made life easy for people across our state, country and the world. We'd like to publish an article in every edition of our SAMPADA and in the website as ,"**PARICHAYA**". In wake of this, we invite bio of personalities from our readers which we can use in SAMPADA. You can give us a write-up about yourself too. We'd like to convey hereby that there are information hungry UVCEians who want to know about their fellows and reminisce and reconnect with them.

Mail us the bio's, your queries at, **megareunion@visionuvce.in**.

---

Do you want to share your memories about the college days with others?
Do you want to publish group photo of your batch, maybe in college or trip?
You want to recollect some important happenings in college during your period?
Please do send us at

**megareunion @visionuvce.in**

## PRINCIPALS OF COLLEGE

**DR NARAYANA REDDY**

1993-1995

**DR K RANGA**

1995-1997

# UVCE CAMPUS BUZZ

- The buzz as we had reported in the last edition is going great guns this month too with a slew of educative, informative, high decibel, adrenaline pumping, jaw dropping events on the list.

- The month of November is the month of festivities and of enjoyment. It starts with Kannada Rajyotsava, Deepavali and then on UVCE takes flashy wings to showcase, KAGADA, a national level technical paper presentation which was held on 30th of October, in association with BRV VARDHAN paper presentation contest under the IEEE Bangalore section wing, a workshop on amateur radio (HAM RADIO) and satellites by UPARC (Upagraha Amateur Radio Club) under the shade of Dept of ECE, UVCE with VC of BU inaugurating the event, INSPIRON, an entrepreneurial and management based fest, a kind of its own among the fests across college on 12th and 13th, FIESTA, the intra-collegiate cultural fest that has made every UVCEian wait with huge expectation to let their hair down is in offing too. We are sure engineering can't get more merrier than this.

- We are proud to announce that the stall that was put up by Placement and Training Centre, UVCE in, TRANSITION, an initiative conducted by Cognizant Technological Solutions, won 2nd prize for the effort. Hearty congratulations to those who have made it big. Also, students from UVCE, Sudhakar Pillai and Pranav Deshpande, both from 7th semester, ECE, bagged 1st prize in the quiz conducted by them and the best part was that, they were offered job prospects on the spot after the impressive display of talent.

# Essay / SOP Review

Hello UVCEians,

With the M.S./M.B.A application season in full swing, UVCE SAMVAADA is announcing a Essay/SOP review service for the first time ever in UVCE's history. The team consists of people who have done or currently doing their M.S and/or M.B.A or have professional experience to share their valuable insights to make your essays/SOP more effective.

**Process:**

We have a streamlined process to enable quick turnaround on reviews as well as suitable matches of reviewers to the submitted essays/SOPs. We will use Google Docs for the review process.

Here's the stepwise process -
1. Fill out the Essay/SOP review request form.
2. Pl. share two documents via Google Docs with uvcemasters@gmail.com

(a). Your resume
(b). Final version of the essay/SOP that you intend to submit as part of your application.

Pl. note that the intent of this review process is not to come up with a draft of your essay/SOP but to help you refine and polish the essay before final submission. Therefore, pl. send only the version of the essay/SOP that you think is ready to be submitted along with your application.

Once your essay/SOP is shared in Google Docs, a reviewer will work with you to provide his/her suggestions/feedback. They will tag their comments in the shared document using various colors/highlights. Once the reviewers have provided their input, you can choose to un-share the essay/SOP and appropriately accept/reject their recommendations.

**Review Team:**

**Anil Rao** runs Product Management and Business Strategy at SeaMicro.

**Rajiv Chamraj** is currently Marketing and Business development executive at a mobile video start-up.

**Shesh Vasudevamurthy** completed his BE (ECE 1996) from UVCE and was campus recruited to PCL Mindware and later moved to US for MS (Computer Science) at University of Texas at Arlington.

**Randhir Hebbar** has over 9 years of Project Management and Retail Consulting experience with Retail Clients such as Gap, Nordstrom, Walmart and DELL as well as other companies such as Citigroup and Glaxo Smith-Kline.

**Janardhan Shetty** worked at IBM India Software Labs for two years after graduating in Information Science in 2008 from UVCE. He is currently pursuing MS at Texas Tech University, Lubbock, USA.

## SEETHING SEVENTIES

I joined first semester B. Arch at U.V.C.E, in 1969. We were the third batch to join the Department, which had been started just 2 years previously. I was, on one hand, proud to join a prestigious college where my father had studies before, but on the other hand I was nervous of entering a college which was for most part, a male domain. The atmosphere was very different from that of the school I had attended. There was a separate lounge called a Ladies Room where we spent our breaks in the first year. Later we got bolder and went to the Canteen for snacks.

On the third floor however, where our department was located, we were much at home. We were like one big group—no distinction between juniors and seniors. Sometimes the lectures were held in the old high ceiling lecture halls (above the present principal's chamber). Especially the early morning classes would be welcome, what with the famous Cubbon Park across the road; minus today's traffic. A better locale wouldn't be there than Cubbon Park to practice surveying and leveling lessons.

The teachers were very approachable and friendly. I have fond memories of our study tours, when the entire department and all the teachers booked an entire railway bogie and went for a trip to North India. We took pride in taking photographs with the simple click cameras we could afford at that time on the trip. The Sikri or similar places, for which huge drawing boards, tapes ranging rods etc had to be carried along with us on the train. The work would stretch sometimes from early morning to late afternoons.

Being a new Department, perhaps we did not have many facilities compared to the present day,(sometimes civil engineering students would share the same drawing hall for their own class with us or sometimes with juniors or seniors as there weren't enough classrooms) , but we worked hard and sincerely to the best of our capacities. Being reserved by nature, I made only a few friends during my stay in college, but I am glad to say that I still have the same affectionate regard for those friends and of course my teachers.

My years at UVCE widened my horizons and made me what I am today.

**V. Prathima Naidu**

**BMS College of Engg., Bangalore**

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

To me, UVCE stands for Unique, Vivid and Comprehensive Excellence-it was, is and I hope always will be a college with a difference. It blends the mellow, grand old buildings and a great tradition with the best and latest knowledge, facilities and education. I am sure that each and every one of us who have studied in this venerable institution has warm and happy recollections of the years spent here.

When I joined in 1973, there were just few girls in the entire engineering college (including all the five years of the course) – now it must be five hundred or more! We girls had a very cozy life

with a comfortable Ladies' Room which was the envy of our classmates. We were very conscious that we were extremely fortunate , especially in the Electronics Department, where we were termed 'la crème de la crème' (The cream of creams), I think this must be still the same for the present generation, but in those days, there was in addition, a relaxed and serene atmosphere with confidence that our future careers were bound to be bright since graduating from UVCE itself was an honor.

We in UVCE used to bag at least nine out of ten State Ranks when I was studying. We used to grudge the one rank left over and try our best to keep all the other colleges from getting into the list! Maybe  that was a life which had less competition than today, but we must and do thank our professors and lecturers for the excellent coaching and firm grounding we obtained.

I am also extremely happy that after obtaining my ME degree, and working at ISRO Satellite Centre for 15 years, I was able to register for my Ph.D under Prof. H. N. Shivashankar, again at UVCE.  In spite of his very busy schedule, and my own responsibilities, I could still spend quite an amount of time in the familiar campus and recapture the carefree days as a student once again. This time, the library was much larger and the computer facilities had become very impressive. The notice boards showed the exciting opportunities in the curricular and extracurricular activities, and extremely up to date information. However most of the rooms looked just the same and the friendly, being college atmosphere was as calm and relaxing as before. In fact most of my old lecturers were still there and all looked exactly the same- there must be some magic elixir in the air which gives eternal youth to those who spend their time there!

In conclusion, it is clear that UVCE gave us not just an engineering degree but a lot of priceless gifts such as Quest for Excellence, Unbeatable, Vigorous, and Confidence and An Exhilarating time. Thank You, UVCE for this great experience!

**Dr.Kamalini Martin**
**(BE 1978, Ph.D 1999)**
**ISRO Satellite Centre, Bangalore.**

## TIME IS PRECIOUS

To know the value of one year, ask a student who has failed in the exam.

To know the value of one month, ask the mother who has delivered the premature baby.

To know the value of one day, ask the editor of a weekly.

To know the value of one hour, ask the lovers who are waiting to meet.

To know the value of one minute, ask the person who has missed the train.

To know the value of one second, ask the person who has survived the accident narrowily.

To know the value of one millisecond, ask the athlete who has come second in Olympics.

**IBRAHIM Y**
**2000 MECHANICAL**

Note: All the above articles and photos are taken from previous college magazines (CHIRANTANA, VINYASA) Articles about your college days and memories are welcome. Along with the articles from College Magazines, we would also like to publish more articles, which the other Alumni would like to know more.

# What others are saying about MR???

This MegaReunion, whose so ever idea is a wonderful one. I very much appreciate it. This is an opportunity for meeting the UVCEians since 1940s. Even my own classmates have not been able to meet each other. It will be a very nice opportunity and feeling. All the best and wish a grand success.

**DR C BADRINATH**
**1969-74 MECH**

I am very encouraged to see this initiative being taken up on a grand scale. UVCE has some great students and alumni and connecting everyone will be beneficial to all. This should do wonder to promote the UVCE brand. I am happy to get involved in anyway I can... Good Luck !!!

**ANAND RAO**
**2001 MECH**

It is better to build BRIDGES rather than WALLS. I am really happy about it and wish to join hands with the Organising Committee, who have instrumented in setting this wonderful event of bringing all the UVCEians together.

**G HALAPPA**
**1981 EEE**

Tell what you feel about the UVCE MegaReunion 2011. megareunion @visionuvce.in

Nostalgia is something that comes easily for everyone associated with this college of around 90 years of history. Looking forward to meet, talk, laugh with fellow "PROUD UVCEians" Hope the two days will bring out all the greta memories and emotions, I have with this college.
**ABHINANDAN S**
**2008 ECE**

Looking forward to the opportunity to meet the classmates and other fellow alumni, Explore opportunities to make UVCE an even greater institution.

**Y R SUDHAKAR**
**1983-88 Batch**

Here we go, UVCEians in retro..!!
Their memorable days of learning with fun, their idea of celebrations, those nostalgic faces, their energy to show the world that they can win and all this in a wonderful campus, UVCE.
We could muster such subtle feelings from the pictures posted alongside.
**1975 ELECTRONICS**

**1975 ELECTRICAL**

We thank Mr. D Dwarkanath, from 1975 EEE for sharing both these group photos with us.

When was the last time you saw your batch or group photo in Black & White, Retro, Eastman..??? Send it across to us at, megareunion@visionuvce.in, and we will make sure it reaches all your batch-mates will see that and connect with you.

# Think Piece By UVCEians

In this edition, we speak about a rare immaculate personality who has tasted success very early in his career with his sheer hard work and out of the box thinking. **Lohith Ravi**, from **2009 batch CSE**, is an exceptional talent who has had 12 Inventions protected for IBM in past 1 year, 2 Invention are Filed for Patents with 10 of them being published with www.ip.com. He is the youngest person to get plateau in IBM India, till date and was awarded Plateau award within 12 months of joining IBM. He has had 2 Invention Disclosures Filed and 10 Invention Disclosures published. The 2 File rated Disclosures are related to Resource-Adapters and Breakpoints respectively. He shares his knowledge about patents and its operability. We are proud to have his words and we wish him all the success in the future.

## Types of securing your Idea

### 1. Publish

There is an Invention that you don't want to patent, Then you can Publish it in some Invention Disclosure Tracking Databases. This will cost less compared to patenting. People Publish the Inventions when they are dependent on other company Products **Or** When it is dependent on Open-source technologies **Or** When you feel spending huge money patenting the invention may not give enough business value.

When you publish the Invention it means you are securing your Idea and **OTHERS cannot patent** it any more. But the Publish invention is such that, anyone can take and Implement it for free of COST.

### 2. Patent

When the Quality of the Invention is very high and if you suspect enormous Profit/revenue from the Invention, you can go for Patenting Or your company will go for patenting the invention.

Patenting is about, you have secured the Idea, and if anyone wants to use the invention, they have to pay you the money that you demand !! It is like an asset you are creating, and is called INTELLECTUAL PROPERTY, you have made a property and no one else can use it without your permission.

**What is Patentable/Publishable as Invention? Does there exist a core claim you can point at? Verify the idea through searches**

To describe in brief the answers,

- **Patentable Items are:**

    Any novel function or feature that is not obvious OR An existing technology applied in a novel or manner which is not obvious.( This includes new industry standards and methods.) OR Something that has produced unexpected results.

- **Process for Identifying Potentially Patentable Opportunities:**

    > Identify a problem > Identify solutions to the problem > Search for those solutions using the various search tools . Google/patents, etc > Eliminate all solutions that prior art is identified > Further investigate/develop solutions where no prior art is identified.

- **Where to Find Potentially Patentable Opportunities :**
    * Looking in your day to day job
    * Looking in the areas that support your job (i.e. tools, db's, web services etc)
    * Identifying problems that needed a unique solution
    * Breaking up large systems and projects into individual problems and solutions

- **Search your idea before putting to much time into it**

- **Document the search words used in your searches**

    Example: Event Table Key Lookup / Prefix Database Key

Spend no more than 30-45 minutes searching for prior art using a variety of the search tools available

Include any related search results in your invention disclosure submission, in the background section of the disclosure form, and specify how your invention disclosure claims differ from the prior art. Also include how it is better than the prior art if not different enough.

# Life @ UVCE

"Hurry up.. UVCE or BMS? "The CET counselor was staring at me expecting to hear a name.

My mind was oscillating umpteen times to take this firm decision which would ensure me growing on a campus that would decide my career thereafter.  looked at my father who was accompanying me for the CET counseling, took a deep breath. " UVCE, Computer Science" rolled out. The journey thus began for me.

After being born in Bijapur, my life in city like Bangalore was very interesting. As there was a gap of around 10 day for college to start, I began on my initial mission: House hunting. I was soon joined by my friend called Pavan who was my class mate at Sainik School Bijapur. We proudly call ourselves as "Ajeets". Days rolled by and the Ajeet family at UVCE grew to four with Guru and Akshay . Soon in second semester we all shifted to "Shiv Sadan" near 108b bus stop, R T Nagar. Till the last of our college days it remained our dwelling place.

Every student has a first day experience. I am no different. Interesting??? Well very much. There was this boy who suddenly came from nowhere and joined our group. Standing in the corridor few students from my class were discussing about our background and getting to know each other. This group has gone long down the four years to be called as "All Crazy" from CSE. The topics?? Well what can you expect out of a bunch of First day-ers of First Years?? The brain storming session spanned from the " NASA" professor who would be taking  Mechanical subject (I still don't know if he was actually from NASA) to the latest fresh flowers in the garden whom all gardeners are trying  to crater to. This boy whom I was talking about, pointed out some sister (sis??? Reasons later) and asked our opinion. I like a sincere fresher was quite shy to answer that. I jokingly edged him with my fist in his stomach and said "What Machi?? Let's have a better interaction and then comment". May be I was acting all macho on the first day, the punch was quite hard for that boy and he left out a huge sigh of pain and moved behind. The classes went on smoothly and it was tea time. Canteen??? Lets go.

I cursed my holy stars first for 1. Giving that punch 2. Keeping my hand on his shoulder and leaning for almost 30 min( I didn't realize) 3. Calling him "Machi" and "da". It was as if the universe had conspired for this fate full day. Sitting across the table was this guy with few friends and in some serious conversation. Before I could act smart, I was summoned by his highness. Now you must have realized why I called "Her "as "Sister". SIGH. I turned purple. But guess this was the beauty of UVCE. They all laughed at this incident quoting it as intentional and turned my first day at college an eventful one.

Right from attending classes in Lecture Complex, "Ardha Chaha" at Canteen, books hunting in library, interesting lectures of Dr VKR, and intense slumbers during some other lectures, it was a beautiful package. College fests were one event every year we looked up to. Inspiron (Management), Milagro (Cultural), Impetus (Technical)  are the prominent ones. Right from conceptualizing the event to deciding about logistics, it's a great journey.

Games? Well it started with cricket, then with football, then with Basket ball. Cricket remained all time favorite. Internals and exams were quite a contradiction for few. During internals it was a regular scene to find students lined up at college to get expert lectures from students who had studied. Final exams were fun. Fun because we got to study late night, have frequent coffee, go to friends rooms/houses, open books and discuss. With so many interesting places to visit around Bangalore, we were very well motivated to find an empty slot and break free amidst Mother Nature. Right from trekking to sightseeing, we were game. Sometimes our trips coincided with the results announcements. It was a sight of life to see friends search for signals on top of a mountain to know if the results have been announced back in college.

UVCE transforms a student from a teenaged organism to a mature individual. An average student at UVCE experiences it all. Right from the academic rigor, tormented lectures (seldom), few very good professors and staffs, naughty but rock solid friends on whom you could always count on, fear of placements.  They learn to undergo emotional oscillation and mental rigor. Placement season is another important aspect of UVCE. This is the phase where the whole batch comes together as a team and faces the corporate challenges. Long Gyan sessions from our peers, some guest lectures by industry experts and panel discussion with corporate honchos add flavor to the season. UVCE has been hot spot for recruitment by various Companies. I have only seen it growing every year.

I have been fortunate in many aspects. Got into Computer science, played football for college, won medals in Athletics for Bangalore University, took part in college fests and represented my batch for placement process. Basically I got a wholesome development exposure. Presently I am pursuing MBA in a Prominent B School in India. But the spirit of a student from UVCE is still burning in me. The basic principles of life still remain rock solid. Through this write up I have tried to share my experience. Many would have their own. I along with Computer Science Batch of 2009 would like to wish all the present students at UVCE a very best in their Endeavour. **GOD SPEED**

Sandeep B Hanchanale (2005-2009 Computer Science)

## FEEDBACK/SUGGESTIONS

It has been 10 editions and with the same zeal we bring out to you the 11th edition. The response that we have been getting has been less than amazing. We request you not to adjust to whatever information or content that we bring out but let us know what you actually like. We are trying to get into your heart to know what is that you all like. We would like Sampada to evoke emotions that a UVCEian missing his good golden days would emote. Do write into us at megareunion@visionuvce.in for feedbacks and suggestions. Let us know the changes that you would like to see in Sampada and we will be glad to consider them.

Thanks,

Team Sampada.
