

SAMPADA

YOUR WINDOW TO UVCE AND UVCEIANS

VOLUME: 1, ISSUE: 8

HAIL O' UCE

Gleaming with splendour you stand' midst we comrades dear
O'erwhelmed with mirth we sing of Thee that you hear;
'Tis with love and honour that our heads we bow to Thee,
Our Lord, we're thine children - hail O, UCE

Blessed are we to be thy students, give us the knowledge,
Mighty thou are to be our Lord, grant us the courage;
For thy choicest blessings to shower on, we sing with glee,
Our Friend, echos thou shall hear of - hail O, UCE

Lead us thee Kindly light, show us the way right,
Give us that elixir of life, 'wisdom' to live with might;
Glory to our masters all here and glory to each conferee,
Ave Lord, in thy honour we say - hail O, UCE

Jubilant episodes of thy victory are true and bold,
Fifty - years Youth thou are wit memories carved in gold;
With glory of Golden - Jubilee, here for centuries will thou be,
Our Alma Master, ballads of laurels we chant - hail O, UCE

M K RAJAN

Editor's Note

M K Rajan was the Student Editor of the second magazine in the history of this college. Both as an alumnus of this college and as an editor he has provided us with much inspiration. He was from the Batch of 1969, during when, he wrote this poem about our Alma Mater, which was celebrating its Golden Jubilee. We commend his spirit as a source of encouragement for all who follow this arduous path. We promise that we will get in touch with him at the earliest, to reach out his message to everyone and also convey our gratitude and well wishes to him. We will also publish the Editor's note from the '69 magazine in the coming editions. Also, we would like to add that UVCE was known as UCE in the early days of its inception.

6th AKKA World Kannada Conference, NEW JERSEY

An alumni meet has been scheduled during the 6th AKKA WORLD CONFERENCE (Association of Kannada Kootas of America) on 4th Sept. at 2.00 PM. The purpose of this event is to garner inputs and knowledge from various alumni for the hosting of MegaReunion.

Further objectives set for this meet are to reconnect with old college friends, meet the other alumni of UVCE who are actively striving to organise this event, exchange ideas, develop a network of UVCEians wherever possible, and to give back to the community.

For further details, contact Mr. Suresh Arya (80-85 Batch EE)
732-546-3300/ 646-554-4474 or mail suresharya@gmail.com

MEGA REUNION

MegaReunion activities this month, hit a new high with some landmark decisions being taken. Even though the activities were happening at a brisk pace, it lacked one thing, that there was no committee or a structure identified to carry out specific tasks. This was a major announcement that was passed on to the MegaReunion enthusiasts. These were all done under the guidance of Mr. Rajiv Chamraj, Mr. Sridhar Gowda, Mr. Madhav, Mr. Rajesh and Mrs. Alice Abraham. They were the key people in identifying the talented and enthusiastic UVCE alumni to lead each of these committee.

We all had a meeting last week to identify and assign the tasks accordingly. This meeting was attended by an enthusiastic organizing crowd of 18 members each of whom, very good at handling responsibilities, managing a team, innovative thinking and most importantly, a zeal to do something good for UVCE.

We have been receiving requests from the UVCE alumni for information about the event, its progress and their request for involvement. We are very glad to have received such mails and requests coming our way when all that we need is attention, support and encouragement.

The tasks have been divided into various arena like agenda committee, sponsorship committee, marketing committee, editorial and content management committee, event management committee, hospitality committee and volunteer committee, each of which is headed or taken care of by individuals acting as leaders and under whom there will be a team which the leader has to form to get the tasks done. The tasks are well thought out, keeping in view to maximize the efficiency of the event.

With so much happening in the zone of MR, it is time for you all to come to take part in this, help us drive the event among all UVCEians, support us and help us in any way you would wish to. If you want to help us by volunteering to do the tasks, please choose amongst the tasks mentioned above and volunteer yourself and contact us so that we can put you under the right person for the right task.

We are looking towards the event perspective right now and we will need ideas from your end for the on-the-day events, organizing speakers and volunteering for the same. The next important action item would be to, drive the registration process, which will soon start,

amongst all the UVCEians and get the maximum registrations as it is the most helpful task to support the event all through the two days. Also along the most important things, sponsorships are at the forefront. We would like you to introduce to us the potential sponsors, industries and donors etc.

The main initiative of the MR is not the event but the things that follow the event. We are looking forward for suggestions and we want you to come forward to form the initiatives and take it forward so that it is of the maximum use to all the students and in a whole, for UVCE. Lets put the best foot forward and relive the glory of UVCE and get it back right on top of the charts.

For all the suggestions, volunteering and participation, you can reach us at, megareunion@visionuvce.in.

For all the updated, information you can always browse through our website, www.visionuvce.in.

Thank You,
Team MegaReunion.

MONTHLY MEETING

The month, meeting was held twice, with total of around 40 members attending the event. Rajiv Chamraj from Bay Area, Madhav (1986 Civil), T V Raghunath (1982 ECE), Kamala Raghunath(1984), Alice Abraham (1991), Srikanth B K(1991),Trivikram (1991),Rajesh (2000), Vishnu Govind (2005) were present along with others. The key agenda items that were discussed during the meeting are:

>>The developments along the Mega-Reunion front and updating the attendees about the presence, publicity and

reach of the event till now. The registration process which is going to start soon, will need a huge opening and awareness. This is possible only if all the active alumni, batch coordinators and MR committee come together and publicize it in a way so that it is as far reaching as possible.

>>The next important key item discussed, is the sponsorship approach. This needs to be as pompous and professional as possible so that we end up generating maximum benefits for UVCE.

>>This was followed by the invitations to join the MR task committees to help them in forming a right platform to organize the volunteer. The purpose and the structure was conveyed to the participants.

We all know, that you all are willing to help us. To know more about the same, please do attend the monthly meeting and increase the head-count of volunteers, batch coordinators and eventually increase the alumni base.

UVCE NEWS

- The Karnataka CET counseling has begun and we are hoping that the best students choose UVCE and the most probable date of start of the engineering course for the fresh batch would be in the 3rd week of August. There has been a delay in starting the college since there was a hassle with AICTE approval for allotting engineering seats to students for which the government was battling it out and it has been resolved right now and counseling has begun and this
- will be followed by the second round before which the college the begins. We wish all the students who will be on board in UVCE and may they reap in best of the fortunes.
- The Placements for the batch 2011 is starting from the August and we wish all the students a bright future in the respective fields ,they choose, and hope that they will uplift the name of UVCE to new heights.
- A technical article titled “ Efficient Disaster Management System using Mobile Ad-Hoc Networks “ by the UVCE alumni of 2009 batch from the batch of Electronics and Communication, under the guidance of Dr. G Narendra Kumar, Chairman, Department of Electronics and Communication, has been selected for international conference to be held at NIT K, Surathkal and in Malaysia.

Placement Stats of 2010 Batch

The placements in UVCE for the batch 2010 has done exceedingly well even under the shadow of recession which left the placement cells of colleges dry with most of the colleges having a lack luster performance in terms of placements. In such trying times, UVCE placement office has done a miraculous job to get close to 95% of the students, offered, with total of **519 offers**. All kudos to our, Placement Officer, P Deepa Shenoy and the placement coordinators. We are very thankful to them for all that they have done and sharing the stats with us. Below is the placement statistics for the batch 2010.

ARTICLES

Fortuitous Fifties

I am extremely happy to learn that the University Visvesvaraya College of Engineering, Bangalore has completed 85 years of its existence and a Commemorative Volume is being brought out on the occasion.

I had the privilege of doing my BE degree course in Mechanical Engineering at UVCE during the years 1957-1961. It already had a great name and Prof. B.R Narayana Iyengar was the Principal and Professor of Mechanical Engineering at that time. He was a great personality- academically, as a teacher and as a human being, he and the rest of the staff took considerable interest in the new students and helped us adjust to the new atmosphere of professional college. We learnt a variety of new subjects – some well and some not so well. For me, staying in the hostel, joining NCC and going to camps and participating in extra-curricular activities like debates was all part of learning and growing up. I should thank the college immensely for the foundation it laid for my further professional growth.

Time has moved on. The engineering technology has changed enormously. There is great responsibility on colleges like UVCE to bring out first rate engineering graduates who can quickly get into modern technological fields. Teaching and research must go further for this. Modern equipment becomes essential for training students to a higher level of competence. There is an urgent need for colleges like UVCE to increase their interactions with the excellent institutes of higher learning, well equipped R&D laboratories and modern high technology industries that exist in Bangalore. New initiatives need to be taken and I am sure UVCE and Bangalore University are fully aware of this.

Let me once again wish all the best to my alma mater and trust that it will be one of the best institutions in the country in the years to come.

T.S Prahlad

*Distinguished Scientist,
National Aerospace Laboratories.*

During the period 1957-1961, when I was a student at University Visvesvaraya College of Engineering, this college was the best in the state and it was preferred destination for all the students in the State. In fact, the students of this college bagged most of the Mysore University Examination. This was largely due, not only to the intrinsic merit of the students, but also to the contributions to the excellent faculty in the college, each of whom exhibited commitment and devotion to teaching.

The college also had so many talented Sportsmen winning laurels, not only at State levels but also at the National levels in Tennis, Basket ball Cricket and so on..

It is the testimony of the Quality of the Institution that many of the alumni of that period are now occupying very high positions, in the Private and Public sectors, IIT's and Universities, in India and abroad.

It is a pleasant duty to acknowledge our indebtedness to our alma mater for providing the platform for our future success. I wish the University Visvesvaraya College of Engineering all success in its endeavors to educate and train our youth for successful professional careers.

Dr. R. Natarajan

*Chairman, AICTE,
New Delhi*

In June 1956 I joined the BE degree course in UVCE at that time it was called University College of Engineering and belonged to the University of Mysore. UVCE had only three departments. They were Civil, Mechanical and Electrical Engineering. At that time seats for Civil Engineering was in high demand, next was Mechanical and last was Electrical Engineering. I opted for Electrical Engineering as I was interested in it. There were only 14 students in Electrical course and no girl students in UVCE.

At that time there was no electronics course or computer course at UVCE. Shockley in USA just then had invented the transistor. It was practically not heard in Bangalore. In Electrical Engineering course students studied mainly Electrical Machines, Transmission and Distribution and some Mechanical subjects and some civil engineering subjects including surveying was compulsory. We had very interesting lecturers and professors to name some of them Prof. B.R. Narayana Iyengar, Prof. Venkatachala Iyengar, Prof. Ramesh, Mr. S. Lakshman Reddy, Mr. A. Veerabhadra, Prof. M. P. Chowdaiah and Prof. D. B. Narasimhaiah.

I still remember the educational tour in which we visited many places all over India in which Mr. Lakshman Reddy accompanied us.

In those days there were only few motor vehicles in Bangalore. There were no auto rickshaws. I used to come to college in an imported Italian scooter, no scooters were manufactured in India. I was the only one having a scooter in the college and there were only about a dozen of scooters in Bangalore! Some of my colleague nick named me as "Scooter Swamy".

All the students worked hard and I passed out in first class in 1960.

My stay in UVCE was highly fruitful laying secure foundations to my future.

Dr. M. Narayana Swamy

College Magazine Section

The Charge of the Student Brigade

(With Acknowledgement to Lord Tennyson, without whom the Poetess might have been at a loss for words)

Time is short; Time is short,
Time is very short,
Into the Halls of Doom,
Troop all the students in gloom.

"Only two months more,
Study"; the lecturers roar
Only dark somber futures,
See the poor hunted creatures.

Maths to the right of them,
Physics to the left of them,
Drawing before them,
Clamouring attention.

Stormed at with Physics and its law,
Intersections of Solids to draw,
Oh ! Where can they seek repose?
Its certainly not in prose !
"Balance this equation,
Give laws of refraction",
Come on you lazy dolts,
Right short notes on screws and bolts.
Their's not to make reply
Their's not to reason why,

Theirs but to do and cry
Into the Halls of Doom
Troops all the students in gloom.

What is Q plus Q into P?
What is the difference between A-C and D-

C,-

All these with unflinching face,
They take it in their normal pace,
The brave students Brigade.

The effort of the Girls
Say it with a Blush

The photo is from the occasion of Golden Jubilee Celebrations of the college, during 1967-68 wherein few cultural events were organized and the students actively participated in all the activities.

All the above articles and photos are taken from previous college magazines (CHIRANTANA, VINYASA, Golden Jubilee Celebration Edition). Please do share with us any photos, articles you have, of your or your batchmates during your college days.

Story About MILAGRO

I would like to clarify that it was actually started in 1994.

Praveen Moorthy (who is copied on this email) and myself along with a few others used to attend inter collegiate fests in early 1994 and wanted UVCE to have a festival of its own.

The thought was daunting as we were still in the 4th semester and were not sure if UVCE could attract the crowd as seen in other colleges. I have to say it surely was an arduous process trying to get sponsors.

The idea started taking shape and Shashank Hedge who was the President in 1994 got involved as well. He was instrumental as well in making the first Milagro happen.

So here are a few interesting snippets from the first Milagro in 1994. It was a 2 day festival.

(i) We were desperate for any kind of sponsorship. I remember roaming around the industrial belt of Peenya asking establishments which were basically nothing but 4 walls with a tin roof for sponsorship.

(ii) We intended to have a tech fair on the first day (Rs.5000 per stall) and approached many companies, but none were interested. Praveen and

myself were given an earful from a Cranes Software guy for not being really clear about the focus of the tech fair. In the end though, they did take a stall and sadly enough, they were the only ones.

(ii) Pepsi agreed to sponsor the rock show on the 2nd day of the festival, but backed away at the last minute. Praveen and myself camped out at the Pepsi office for a few hours until we got a cheque for Rs.50,000. I still remember riding through the rain with Pepsi banners wrapped all around us.

(iii) The rock show on the 2nd day was by a trash metal group called 'Warden'. Some of Warden's members went on to form 'Millennium'. The rock show was a huge success and laid the initial foundation of Milagro I suppose.

The second Milagro in 1995 was relatively easy and was a 3 day festival.

The third Milagro in 1996 was the year we were passing out. Praveen Moorthy became the President and did a fantastic job of seeing the festival through. Hero Honda was the main sponsor, but they also backed

out towards the end. The group of about 20-30 students went to the Hero Honda office on M.G.Road and staged a protest. Finally they relented and provided sponsorship. Millennium was the main attraction for the rock show on the 3rd and final day.

There were a lot of folks involved right from the beginning, who without their contributions, Milagro would not exist. If I start naming them, I fear that I would leave someone out.

Nonetheless, Milagro was one of life's lessons that I carry with me till this day, that nothing is impossible. We were able to start something that has grown so monumental and left an indelible mark in UVCE's history.

Praveen has maintained all the memorabilia from the very first Milagro and am sure would be happy to share them, to include in any future newsletters.

I thought that this piece of history needed to be presented accurately for present and future UVCEians going forwards.

UVCE draws up centenary plans

Express News Service
Bangalore, June 2

THE city's oldest engineering college, University Visvesvaraya College of Engineering, is all geared up for the centenary celebrations and has planned several new projects to mark the occasion.

The college though officially established in 1917, by Sir M Visvesvaraya, the *diwan* (chief minister) of the erstwhile Wadiyar kings, technical course workshops were started as early as in 1913.

Even before completion of 100 years in 2013, the college will have a new building that will be ready by 2016.

Speaking to *Express*, UVCE principal K R Venugopal said that the government had promised to provide Rs 40 crore for the construction of a new building including a seven-storeyed mechanical block, another seven-storeyed building in memory of Sir M Visvesvaraya and a hostel block for 500 students.

He said that the existing mechanical block was just a shed, which had not been altered since 1913. The front portion of the college, which has a heritage look will not be altered.

"We need Rs 6.5 crore to give a facelift to the front heritage portion," he said.

Venugopal said that they would soon form the Sir M Visvesvaraya Centenary Trust, which will have the higher education minister and two distinguished alumni as members. "We will develop a

The bust of Sir M Visvesvaraya in the cabin of Dr Venugopal, UVCE principal. The statue will be installed at the campus soon

website, through which we will try to contact the alumni, who are spread across the globe, and collect funds," he said.

The funds collected will be utilised for various purposes, including the construction of an open air theatre. The college has around 100 teaching staff members, 70 of whom are PhD holders. "We are also planning to set up the Sir M V Research Centre in the campus," he added.

Principal's contribution

Venugopal, who has been associated

with UVCE for the past 35 years, has donated Rs 5 lakh for Sir Visvesvaraya's bust, which it plans to install in front of the college.

"In the past three years, I have published five books, for which I got a payment of Rs 5 lakh. I will contribute that amount for the bust," he said.

New courses

To mark the centenary celebrations, UVCE plans to introduce new courses like BE in bio-technology, medical electronics and nuclear energy.

Evening college courses will be extended to computer science and civil engineering also.

Request

Venugopal has requested the alumni to contribute to the development of the college. Write to him at venugopalkr@gmail.com

Rs 40 cr

for construction of new seven-storeyed building

Rs 6.5 cr

for facelift to university's front heritage portion

Did you know?

In 1919, late Professor S Ramaswamy put up proposals for separating the sports activities. The Government was induced to allot a portion of grounds in the Cubbon park, east of the road in front of Sir K Seshadri Iyer's statue.

Later, at the time when Sir Mirza M Ismail was the Diwan, he allotted the students of the college to play in the Sampige Tank bed. But, after the end of the War, the then Government ordered the construction of the stadium. The masonry structure was pulled out and the college was unceremoniously forced out and no time or notice was given to collect the things belonging to the college. They were dumped and the cup of sorrow of the sportsmen of the college was full..

VISION UVCE

I still remember the day we had the last exams and it has been an year since we came out of college. I just am amazed that an year has passed by so swiftly. The last day of the college last year was when few of us friends sat down late in the evening under the shades of the old and big trees in front of the college cyber MINCHU. We were not comfortable about the fact that we will no more be part of this great college on a day to day basis but we all pledged amongst ourselves, that we won't let the UVCE inside us to go in the air and we shall come back to UVCE for anything it needs. The team was formed, a website was launched, activities were conducted, we took part actively in bringing up the new placement panel rooms and there also is a map right at the entrance to guide every newcomer with directions and we launched SAMPADA (monthly e-magazine). Well I am talking about the VI-

SIONUVCE. It has been an year since the group was formed and it has been fairly successful in unifying alumni of various batches under one platform and on toes to take part and to organize an event of the scale of MegaReunion, which will reap in huge benefits to our beloved college and the best of all, watching alumni of various batches on one day happily whiling away time talking to their old friends, reminiscing, what everyone calls, "The best days of their life ". I took this opportunity to remember this and to also tell you that the team will continue its efforts of stamping UVCE in the hearts of UVCEians. Watch out for us, as there are many more things to come and help us realize them with your active coordination, support and suggestions.

-For Team **VISIONUVCE**

(Sri Harsha D V, ECE 09 Batch)

REUNIONS

UVCE '87-91 Batch Electrical met for the first time on Friendship Day last year after 18 long years. Ever since , they have been meeting every 3 months or so in Bangalore. The batch has since come together to support social causes like the Sumangali Seva Ashram (SSA), a social service organization and the Belaku Samsthe. The second annual reunion of the batch is happening on the 8th of August, 2010 at the Atria Hotel. About 55 batchmates are expected to attend the class reunion.

The 70-odd students of ISE 2005-09 have organised a get together on 7th August 2010, a year after graudation. Many feel the need for such a gathering, which will be held at a local resort. Most of the people from the batch are expected to attend the get together which will definitely be filled with a lot of reminiscence, some nostalgia, and a lot of fun activities.

Want to feature your CLASS REUNION in SAMPADA, so that it can reach out others who might be missing ?

THINK PIECE BY UVCEIANS

This is an article where we present to you all, the 'apart-from-work' activities of the UVCE alumni which in turn aides your day-to-day life. We continue from the last edition, a blog from, <http://www.geeks-stuff.blogspot.com/>, an job-easily-done kind of website that gives us tips about how to use the computer and the internet to get the best out of it in the shortest possible way.

The author of this beautiful blog is, **Rajath R** from **CSE 2009 batch**. We apologize for the typo we caused in our last edition wherein we mentioned the author of this blog in the name of another person. We regret for the typo caused and we will make sure we won't let such mistakes happen again. So we take this chance to provide one more blog piece and hope you enjoy reading it. Do browse the blog link given above for many more such useful articles.

ONLINE COMPILERS:

Ever had a code but no compiler to compile it? Well, it may so happen that sometimes we get a piece of code which we want to try out but we don't have the respective compiler installed in our system. This may be because we are at workplace or browsing centre or any such place where we either have restricted access to install the compilers or we're too lazy to install.

Anyway, IdeOne is one such website that you can use for compiling a code. It supports a hell lot of languages and you can compile them online and view the output. No hassles; all you need to do is paste the piece of code in the text box and click on Run. You'll get the output. Codepad is another site with similar functionality, but the difference is that Codepad doesn't support as many languages as IdeOne does.

Feedback/Suggestions

Are we reaching you and can we be heard..?

Well you have to tell us, if we are not. We have been doing this on a regular basis with every edition i.e. trying to sound big and be heard and get your attention. We'd like to know what you think of SAMPADA as you see it. We want you to be an editor and have a check on what is needed in SAMPADA from the user

point of view. After all, this is ours and we need our product to sell big, the idea of an alumni magazine and to everyone so that you all can start actively involving in wrapping this magazine with most beautiful and coveted things about UVCE and give that package to every UVCEian who needs oxygen to breathe UVCE.

So pour in your views, feedbacks, your articles, your

memorabilia about UVCE and here we are trying to catch hold of it and we are sure, many of them are waiting to get to know about them too.

Waiting for your suggestions and involvement,

Team SAMPADA.
